

ENVIRONMENTAL MANAGEMENT POLICY OF

SID DENNIS

and Sons Ltd.

DATED 1st JANUARY 2017

The work of Sid Dennis & Sons Ltd has an effect on the local environment and impacts on the global environment. It is committed to reducing the environmental impact of its activities so that future generations may benefit from the local environment and not be affected by its activities.

Sid Dennis & Sons Ltd will carry out its activities in compliance with all relevant environmental regulations and will seek to prevent pollution. Sid Dennis & Sons Ltd continually aims to improve its environmental performance.

Sid Dennis & Sons Ltd aims to improve the quality of the local environment by minimising any adverse environmental impacts resulting from its activities and encouraging its customers and business partnerships within the community to do the same.

As Directors of Sid Dennis and Sons Ltd, we, Mr A.F. Dennis and Mr S.A. Dennis, are fully committed to providing and maintaining environmentally friendly systems of work, including the effective provision of clean waste streams and recyclable products. We believe these objectives can be achieved by;

- Having competent employees who take day to day responsibility for environmental management in the areas over which they have control and encouraging employees to be fully involved in the environmental issues relating to the business;
- Conducting regular inspections of the workplace to identify breaches of environmental issues and to ensure compliance with existing standards and regulations;
- Ensuring all environmental documents and systems of working are communicated throughout the organisation;
- Appointing an external advisor to provide guidance and advice on matters relating to environmental management issues; and

All employees are requested to report any deficiencies in the environmental arrangements to their supervisor, who will take the appropriate action.
